RE: Permit #658 2006-2007 Annual Report

Dear Bill:

Enclosed is Mountain Cement Company's Annual Report for the Weaver Limestone Quarry, permit no. 658.

Enclosed for your review are materials required for the report (e.g. 2003-2007 report form, a map, AR-1, Groundwater Quality results).

If you have any questions, please contact me by phone at Mountain Cement Company (307) 745-4879 ext. 135 or (307)760-6701 (cell).

Sincerely,

Bob Kersey

Required Annual Report Information

FOR LARGE MINING OPERATIONS

RE: Wyoming Environmental Quality as Amended §35-11-411, Annual Report

1. (a) Name of Permittee: Mountain Cement Company
   (b) Address: 5 Sand Creek Road
   (c) Mining Permit Number: Permit No. 658
   (d) Date of Permit Issuance (and any Amendment): February 29, 1996
   (e) Mineral(s) Mined: **Limestone**
   (f) State and Federal Mineral Lease: **None**

2. Time period covered by the report: February 28, 2006 to February 27, 2007

3. Mining:
   (a) Tabulate acreage disturbed (by pits, roads, facilities, etc.) during the report period and illustrate on map.
   None.

   (b) Tabulate acreage affected to date by years and illustrate on map.
   2.6 acres disturbed during 1996-1997 (entrance road)
   2.6 acres disturbed during 1997-1998 (remaining haulroad)
   14.0 acres disturbed during 1997-1998 (initial mining area)
   17.1 acres disturbed during 2000-2001
   23.4 acres disturbed during 2002-2003
   2.2 acres disturbed during 2003-2004
   8.1 acres affected on north side of pit for topsoil and spoil storage
   3.9 acres affected during mining activity (total discrepancy affected acres)*
   20.4 acres disturbed during 2004-2005
   0.0 acres disturbed during 2005-2006
   11.4 acres disturbed during 2006-2007
   105.7 total acres disturbed since mine start-up
   10.0 acres projected disturbance for the 2007-2008 reporting period
   115.7 acres total affected and projected disturbance

   (c) Tabulate all topsoil stockpile volumes, date of stockpiling and illustrate on map.
   500 CY stockpiled during 1996-1997 (TS-1 entrance road)
   1,300 CY stockpiled during 1997-1998 (TS-2 entrance road)
   10,700 CY stockpiled during 1997-1998 (TS-3)
   10,150 CY stockpiled during 2000-2001 (TS-4)
   8,100 CY stockpiled during 2001-2002 (TS-5)
   16,700 CY stockpiled during 2003-2004, 2004-2005 (TS-6)
   2,090 CY stockpiled during 2004-2005 (TS-7)
   1,680 CY stockpiled during 2004-2005 (TS-8)

---

* A more accurate means of analysis (i.e. gps, mapping, etc.) revealed 3.9 affected acres discrepancy in 2003-2004.

16,700 CY stockpiled during 2004-2005 (TS-9)
0.0 CY stockpiled during 2005-2006
13,000 CY stockpiled during 2006-2007
79,320 CY of topsoil are currently stockpiled for reclamation use since mine start-up.

(d) Tabulate all out-of-pit spoil volumes, dates of placement and illustrate on map.
1,300 CY stockpiled by Harney Creek Crossing (OB-1)
35,000 CY stockpiled during 1997-1998, 2002-2003 (OB-2)
25,000 CY stockpiled during 2000-2001, 2002-2003 (OB-3)
20,000 CY stockpiled during 2002-2003 (OB-4)
0.0 CY stockpiled during 2004-2005 (all over overburden was returned to the northern active mining pit for reclamation preparation)
0.0 CY stockpiled during 2005-2006
0.0 CY stockpiled during 2006-2007
81,300 CY of overburden are currently stockpiled since mine start-up for reclamation use.

(e) Tabulate quantity of commodity mined by years.
0 tons 1996-1997
124,376 tons of limestone mined during 1997-1998
100,500 tons of limestone mined during 1998-1998
148,520 tons of limestone mined during 1999-2000
361,150 tons of limestone mined during 2000-2001
530,950 tons of limestone mined during 2001-2002
595,530 tons of limestone mined during 2002-2003
405,027 tons of limestone mined during 2003-2004 (as of February 5th, 2004)
723,215 tons of limestone mined during 2004-2005 (as of February 9th, 2005)
256,238 tons of limestone mined during 2005-2006 (as of February 27th, 2006)
518,584 tons of limestone mined during 2006-2007 (as of February 22nd, 2007)
3,772,372 tons of limestone mined since mine start-up.

(f) Describe any new construction during the report period and illustrate on map; include:

1.	Shop facilities, erection sites.	None
2.	Roads	**None**
3.	Culverts	**None**
4.	Diversion ditches, collector ditches, interceptor ditches, etc.	**None**
5.	Sediment ponds, containment ponds.	**None**
6.	Monitoring sites.	

(g) Describe any environmental problem areas and a proposed plan for mitigating them. Illustrate on map; include:

1.	Pit stability problems.	None
2.	Subsidence.	**None**
3.	Accidental water discharge, dam failure, etc.	**None**
4.	Slumping or sliding.	**None**
5.	Revegetation problem areas.	**None**

4. Reclamation:

(a) Tabulate the acreage completed during the report period and illustrate on map. Distinguish between:

1.	Backfilled, graded, and contoured. Including date of approval for coal permits.	None.
2.	Topsoiled.	None
3.	Seeded.	None
4.	Reseeded.	None
5.	Indicate where special construction or reclamation practices were used such as for sand bodies or alluvial material.	

(b) Submit a map showing the reconstructed contours. The map must be the same scale and contour interval as the PMT map in the approved permit.

None Completed.

(c) Tabulate acreage reclaimed (seeded with permanent seed mix) to date by years and illustrate on map.

No seeding was performed during the 2006-2007 report period.

(d) Describe reclamation procedures used during the report period:

No reclamation occurred during the 2006-2007 report period.

1. Depth of topsoil applied. Indicate whether from stockpile or directly applied.
2. Type of seed used for seeding during the report period.
3. Dates of seeding during the report period.
4. Seeding procedures used.
5. Rate of seed application.
6. Type and rate of any fertilizer applied.
7. Type and rate of mulch applied.
8. Rate of irrigation water applied.
9. Any deviations to the approved reclamation plan including, in addition to the items above, changes to the contour or location of post mining features.

(e) Describe results of previous revegetation efforts; include:

1.	Types of seed that have germinated and are growing.	None
2.	Types of seed that are not growing successfully.	None
3.	Areas experiencing problems with weeds and weed types.	None
4.	Significant erosional problems.	None
5.	Areas if unsuitable overburden on the surface.	None
6.	Procedures used or proposed to correct these problems.	**N/A**

(f) Summarize the actual reclamation costs incurred during the report period. Costs should be itemized for each operation (i.e., grading, topsoil replacement, seeding, etc.) and for each type of disturbance (i.e., spoil, haul roads, facilities removal, etc.) on a per-acre basis.

Not Available

5. Describe in detail mining plans for the coming year including revised time schedules and all proposed deviations from previously approved plans. Acreages should be tabulated and illustrated on a map.

See Mine and Reclamation Plan Summary and Maps AR-1.

6. Describe in detail reclamation plans for the coming year including revised time schedules and deviations form previously approved plans. Acreages should be tabulated and illustrated on a map.

See Mine and Reclamation Plan Summary and Maps AR-1.

NOTE: On items 5 and 6 above, any proposed deviation from the approved mine and reclamation plan must be described in detail. The proposed mining and reclamation plans will be reviewed and the operator will be notified if further information is required. "Significant" deviations will require permit revision application (Form 11) and public notice pursuant to Chapter VII Section 2 of Land Quality Division Noncoal Regulations.

See Mine and Reclamation Plan Summary.

7. Describe in detail all monitoring activities during the report period, summarize the data, describe procedures to correct any noted problems and deviations from previously approved methods, including:

(a)	Groundwater analyses.	**Two wells sampled for analyses during the 2006-2007 reporting period. See Tables V, VI, and attachments for groundwater characteristics summary.**
(b)	Surface water analyses and discharge data.	None Available
(c)	Precipitation data.	None Available
(d)	Subsidence monitoring.	None Available
(e)	Overburden analyses.	None Available
(f)	Topsoil quantities – compare calculated and actual.	None Available
(g)	Vegetation data.	None Available
(h)	Wildlife data.	None Available
(i)	A map showing and identifying monitoring locations.	**See Annual Report Map for Monitoring Well locations.**

8. Operator's Reclamation Performance Bond Estimate as required by Wyoming Statute §35-11-417. Reclamation cost estimates should be itemized in detail to reflect the actual estimated costs of reclaiming all lands which have been affected to date and those lands to be affected during the next report period. Costs must reflect procedures as specified in the approved mine and reclamation plan. The estimated cost of dismantling and disposal of all facilities and structures must be included. Salvage value will not be used to offset bonding requirements. Reclamation projected for the coming year will not be used to offset bonding requirements. Pit backfill costs must reflect actual yardages to be moved. Actual yardages to be moved will reflect the removal or placement of additional material to correct any deviations between the PMT map and the map submitted for part 4.(b).

See attached Table II and Appendix for estimated reclamation costs.

9. Supply any additional information as requested by the Division to:

(a)	Notices of violation	None
(b)	Orders	**None**
(c)	Permit stipulations; and	**None**
(d)	Other special conditions.	**None**

10. All drill holes used for immediate developmental expansion of the advancing pit(s) shall be tabulated by location and depth and shown on the mining plan map. Pursuant to W.S. §35-11-404(e), all drill holes used for exploration shall be reported to the LQD Abandoned Drill Hole Program Supervisor and the State Engineer. **None**

ANNUAL REPORT MAPS

1. Maps must be clear and legible contour maps or recent aerial photos. The preferred scale is 1" = 500'.

2. Map sheets should be of a reasonable size, generally not to exceed 48" on a side.

3. Maps must have a title block with:
   (a) Map title.
   (b) Name and address of permittee.
   (c) Permit and amendment numbers.
   (d) Annual report period.

(e) Scale, north arrow, contour interval, date of photography, etc.

4. All maps must show:
   (a) Legal subdivisions – section, township, and range lines clearly labeled.
   (b) Permit area boundary clearly shown and labeled.
   (c) Amendment areas clearly shown and labeled.

5. The following features should all be clearly identified:
   (a) Topsoil stockpiles (numbered)
   (b) Settling ponds and sediment control structures.
   (c) Haul roads.
   (d) Pits identified by location, name, number, etc.
   (e) Ramps (numbered)
   (f) Out-of-pit spoil dumps including date of initial placement of material (if permanent, give approval date).
   (g) All waste disposal sites including, but not limited to:
       1. Carbonaceous waste dumps.
       2. Partings dumps.
       3. Fly ash disposal sites, etc.
       4. Landfill sites.
   (h) Diversion ditches
   (i) Monitoring sites
   (j) Facilities location (silos, labs, crushers, washbays, etc.)

6. History of mining and reclamation should be documents for all areas. The preferred method is to outline separate areas on the map and assign each a number. Then a summary should be presented listing the following information for each separate area:
   (a) Acreage
   (b) Initial date of disturbance.
   (c) Date of regrading.
   (d) Date of approval of grading.
   (e) Date of topsoiling and approximate depth, source of topsoil.
   (f) Date of mulching and type of mulch.
   (g) Date of seeding.
   (h) Seed mix.
   (i) Date and mix of reseeding.
   (j) Any reworking such as repair of gullies, etc.
   (k) Bond status of areas (type of bond, date of any release and percent released).

7. All areas to be affected by mining and reclamation activities in the coming year should be outlined and labeled.

Annual Report Attachment

A. Please indicate any change in company name or business organization.

No changes since last reporting period.

B. List the names and addresses of the following:

1. General Manager **Tom Del Vecchio, Plant Manager**

2. Party to Receive Notice **Steve Cooley, Environmental Manager**

C. List the names and addresses of all officers, owners and/or controllers. Include titles/positions and beginning and ending dates.

MINE AND RECLAMATION PLAN SUMMARY

Introduction

Mountain Cement Company continued to mine at the Weaver Quarry WDEQ/LQD Permit No. 658 during the past report period. Groundwater monitoring has occurred using the installed monitoring wells (Map AR-1). Mining history and disturbance summary is depicted in the annual report map, AR-1.

Mine Plan

The following mine plan describes the actual mining activities for the 2006-2007 report period and future mining operations for the 2007-2008 report period at Mountain Cement Company Weaver Limestone Quarry, Permit No. 658.

<u>Past Mining Activities:</u> Mining was abandoned in the northeast corner of the pit area due to inferior quality of the limestone. Topsoil and overburden was removed from portions of this area and will later be reclaimed. Another adjacent block, south of the current pit area, was opened starting at the west disturbance line and advanced eastward. Stripping and removal of topsoil and overburden was done in front of the advancing mining block during the last report period. There were 11.4 acres of new disturbance during the 2006-2007 report period. A total of **105.7 acres** have been affected to date. A total of **79,320 CY** of topsoil and **81,300 CY** of overburden are stockpiled for reclamation use.

<u>Projected Mining Activities:</u> Mountain Cement Company plans to continue expanding the southern adjacent pit area eastward, from the west disturbance line, as shown in the Annual Report map. Approximately **10.0 acres** are proposed to be disturbed during the 2007-2008 reporting period. Topsoil will be removed and stockpiled out of the floodwaters, and toe-ditched. Overburden will be placed in the northern adjacent pit for reclamation purposes.

Reclamation Plan

The following reclamation plan describes actual past reclamation and expected future efforts.

Past Reclamation Activities:

Reclamation has not yet been initiated at this mine site. Limestone mining began during the 1997-1998 report period. Upon completion of mining in the north section, reclamation will occur. Initial backfilling of material has occurred along the north and west highwall to prepare for reclamation.

Future Reclamation Activities:

Reclamation is predicted to occur along the northern edges of the pit. Overburden will be removed from the adjacent, southern block and used to backfill and contour the northern pit. Initial backfilling of material has begun along the north highwall of the inactive, northern pit. Limestone mining currently occurs in the adjacent, southern pit area, advancing eastward.

Estimated Reclamation Costs

Mountain Cement Company's reclamation performance bond estimate for the current disturbances and expected disturbances during the 2006-2007 report period are itemized in the Appendix, "Itemized Performance Bond Calculations." The total reclamation costs plus an additional twenty percent (20%) contingency cost, is calculated to be approximately **$318,400.** The bond was increased during 2005-2006 period and is currently *$315,000*.

Table I - Description of Weaver Quarry Lands.
(Includes acreage projected to be disturbed during the upcoming report period.)

Land Description	**Acres**
Permit Area	1,372.5
Acreage-to-Affect	*511.14*
Current Affected Acreage	105.7
Total Acreage-to-Affect Remaining	*405.44*
Lands Requiring Area Bond Cost	105.7
Proposed Disturbance for 2006-2007	10.0
Lands Requiring Full Incremental Bond Cost	0.0
Lands Requiring Partial Incremental Bond Cost (Reseeding)	0.0
Lands with Requested Full Bond Release, > 2Years	0.0
Lands w/ Approved Full Bond Release	0.0
Subtotal (Incremental Bond Total)	**115.7**
Total Native Land Remaining in Permit Area	1,256.8
Total of Bonded, Bond Released and Native Lands	1,372.5

Table II - Estimated Reclamation Costs Summary Table for Disturbances through February 27, 2007 and Projected Disturbances for the 2007-2008 Report Period, Weaver Quarry, LQD Permit No. 658.

BOND TYPE	RECLAMATION ACTIVITY	APPENDIX LQD, Guideline #12	AVERAGE ONE-WAY HAUL (Ft)	UNIT	UNIT COST ($/unit)	TOTAL ($)
Area Bond	Drilling and Blasting	n/a	n/a	2.0 CY/LF x 8,000 LF	$0.10/BCY	1,600
	Dozing	E	50 ft.	2.0 CY/LF x 8,000 LF	$0.146/CY +10% grade	2,336
	Backfilling and Contouring	C 637E Scraper	1,000 ft.	81,300 CY Overburden	$0.937/CY +10% grade	76,178
	Topsoil Redistribution	C 637E Scraper	1,000 ft.	79,320 CY Topsoil	$0.937/CY +10% grade	74,323
	Final Grading	G 16H Motor Grader	n/a	115.7 Acres	$45.65/acre	5,281
	Scarification	P 16H Motor Grader	n/a	115.7 Acres	$41.87/acre	4,844
	Asphalt Ripping	I D9R Dozer	n/a	2.4 Acres	$577.96/acre	1,387
	Demolition	J 200 ft.	n/a	10 (20' section.)	$91.24/unit	912

Itemized Performance Bond Calculations Explanation

I. Pit Backfill and Highwall Reduction

A. Highwall Reduction: The highwall will be reduced to a 3:1 slope by use of shot rock and overburden and unrecoverable limestone. Using drilling, blasting and dozing methods, a highwall of 12 feet average height and approximately 8,000 feet long may need to be reduced to an initial 3:1 slope. At an average highwall of 12 feet, approximately 2.0 CY per linear foot will be dozed to the base of the highwall. Appendix E, "Calculations for Moving Material With a Caterpillar D9N Dozer", 10% Grade, 50 Ft., was used. To calculate drilling and blasting costs, $0.10/BCY was used.

Drilling and Blasting = 2.0 CY x 8,000' @ $0.10/BCY = **$1,600**

Dozing = 2.0 CY x 8,000' @$0.111/CY = **$2,336**

B. Backfill of Overburden and Reject Material: A total of 81,300 CY of reject material and overburden will be hauled an average of 1,000 feet over the pit area and used to slope the highwalls and contouring. Appendix C, "Calculations for Moving Materials with a Caterpillar 637E Push-Pull Scraper Fleet", 10% Resisting Grade, 1,000 Ft., was used.

81,300 CY @ $0.937/CY = **$76,178**

C. Replacement of Topsoil: A total of 79,320 CY of topsoil replacement material will be hauled an average of 1,000 feet over the pit area and roads. Appendix C, "Calculations for Moving Materials with a Caterpillar 637E Push-Pull Scraper Fleet", 10% Resisting Grade, 1,000 Ft., was used.

79,320 CY @ $0.89/CY = **$74,323**

D. Rough and Final Grading: 115.7 acres will require grading. Appendix G, "Calculations For Final Grading with a Caterpillar 16H Motor Grader", was used.

115.7 acres x $45.65/acre = **$5,281**

LQD RECD
FEB 28.2007
PERMIT 658

E. Scarification: The backfilled material will be scarified with a Caterpillar 16H Motor Grader to relieve compaction prior to topsoil replacement. Appendix P, "Cost Estimate for Scarification of Compacted Surfaces", was used.

115.7 acres x \$41.87/acre = **\$4,844**

II. Access Roads and Demolition

A. There is approximately 5,110 LF of road to be reclaimed in the permit area. This includes 3,010 LF of paved road and 1,350 LF of unpaved road (750 LF of unpaved haulroad (0.8 acres) is included in the 2004-2005 proposed disturbance). Costs for moving material, grading, and scarification are already included in the previous calculations. Costs for revegetation will be included in the following sections. Only costs are calculated for ripping the 3,010 LF of asphalt. A road, 3,010 feet long by 35 feet wide will yield 2.4 acres. Appendix I, "Cost Estimate for Ripping Asphalt Using a Caterpillar D9R Dozer", was used.

2.4 acres @ \$577.96/acre = \$1,387

B. Demolition: There will be no permanent features remaining in the permit area (e.g. culverts). To estimate cost associated with culverts removal, a maximum of 200 feet of culvert will used (10 units). Appendix J, "Cost Estimate for Culvert Removal", was used. One unit equals 20 feet section of CMP.

10 units (200 Ft.) @ \$91.24/unit = \$912

There are two, 48-inch culverts, with concrete aprons, installed at the Harney Creek Crossing. It has been estimated in previous reports that it will cost about \$8,500 to remove these culverts.

2, 48-inch culverts at the Harney Creek Crossing = \$8,500

C. Monitoring Wells: There are two monitoring wells that will need to be plugged and abandoned once post-mine groundwater characteristics are considered satisfactory by the WDEQ/LQD. Appendix L, "Abandonment and Sealing of Cased Drill Holes and Monitoring Wells", was used.

Abandonment and Sealing of two monitoring wells =	$2,140

III. Revegetation Costs

A. Final Revegetation: Costs associated with the affected section resulting in vegetation (i.e. seeding, mulching, & prepare soil). This includes the haulroad(s). Appendix Q, "Revegetation Tasks and Costs", was used.

115.7 acres @$625/acre =	$72,313

B. Fencing: Fencing will be used to protect the reclamation from livestock grazing or damage until vegetation growth is established and/or bond released. Approximately 16,200 LF of fencing is currently installed around the current disturbance area, specifically, 1/3 of the area-to-affect. When affected area is released from the authority of the WDEQ/LQD (i.e. bond release), the cost estimated will reflect fence removal. Appendix Q, "Revegetation Tasks and Costs", was used.

16,200 Ft. @$0.96/Ft =	$15,552

Subtotal	**$265,366**
20% DEQ Contingency	**$ 53,073**
Grand Bond Total (rounded up to nearest $100 increment)	**$318,400**
Current Bond Level	***$315,000***
