Re: Lyons Quarry, Permit No. M-1977-208, Technical Revision Approval, Revision No. TR-13

Dear Mr. Wilson:

On July 2, 2015 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on June 2, 2015, addressing the following:

Request to install an Activated Carbon Injection System, a Lime Injection System, and a Selective Non-catalyst Reduction to the processing facilities.

The terms of the Technical Revision No. 13 approved by the Division are hereby incorporated into Permit No. M-1977-208. All other conditions and requirements of Permit No. M-1977-208 remain in full force and effect.

The estimated liability amount of \$8,953,127 exceeds the \$8,826,000.00 performance bond currently held. If you have not already done so, please submit additional bond in the amount of \$127,127.00. The revision will not be final until the bond is approved by the Division. Notice of the Financial Warranty increase will be sent under separate cover.

If you have any questions, please contact me at (303)866-3567 x8116.

Sincerely,

Michael A. Cunningham
Environmental Protection Specialist
