RE: Inspection Report of 1/20/99, Lyons Pit, Southdown Inc.

Dear Ms. Kamnikar,

I am writing this letter to correct a point of information that was stated in the above mentioned report. There was a misunderstanding about the final disposition of the water that is pumped out of C pit as mentioned in statement 4 of the observation section. The water pumped out of C pit is pumped into the plant to a closed loop system in the plant. The water is then used to cool off-gases from our kiln and is evaporated. None of the water from C pit is discharged. Thank you for your attention to this matter. If there are any questions please call me at (303) 823-2113.

Sincerely,

Steve Mossberg
Compliance Manager
