Re: Building Permit BP-06-0692 for INSTALL TWO 100GAL WATER HEATERS IN THE OFFICE BLDG al 5134 Ute Hw,

Plumb In Time

A routine review of our building permit records shows that the work covered by the referenced building permit has not been inspected for at least six months and has not received final inspection approval. Boulder County Building Code Section 109 requires that you obtain final inspection approval before the space covered by the permit is used or occupied.

Boulder County Building Code section 105 provides that a building permit shall expire by limitation and become invalid if the work authorized by the permit is suspended or abandoned for a period of 180 days (6 months) or more. For this reason we want to notify you that your permit may be close to expiring or may have expired. It is certainly in your best interest to obtain the required inspection approvals and we would like to assist you in doing so.

We are here to serve as a resource to you. It is important to have a record of inspection approvals and authorization to use and occupy the space covered by the permit. This will enable you to obtain financing, insurance, and to conduct future real estate transactions.

After reading the above information please contact our office at 303-441-3925 to schedule an inspection or provide a written status report. This report should indicate what work has taken place in the past six months, what work is planned for the next six months, and an indication that the space covered by the permit is not being used or occupied.

We feel that it is your responsibility to resolve this matter. If we do not receive a response within 30 days your building permit file will be closed.

Thank You
