AT&T Wireless - LETTER OF INTENT

To whom it may concern:

AT&T Wireless is requesting a determination of the zoning process required to move 1 sector of antennas on the silo located at 5145 Ute Hwy., Lyons, CO. The original zoning was approved by resolution 2006-158 to install 12 antennas on the subject property. One of the sectors of 4 antennas was constructed in the wrong location. The Beta sector facing 210 degrees was installed on the silo instead of above the existing service elevator as approved. AT&T is now wanting to install the future antennas that were approved in 2006. However, they are requesting approval to flush mount the 4 antennas in the Beta sector on the silo itself. They antennas will be painted to match the building.

Please let me know if this change can be handled as an administrative level since their is minor change to the original approval or it the approval needs to go before the planning commission.

You may reach me at 303 859-1341 with any questions or concerns. Please let me know if you require any additional information. Thank you.

Sincerely,

Jerry will provide written confirmation that CMEX is OK with this amendment 3/16/09 CO

Re: Building Permit BP-08-1907 for INSTALL 3 PANEL ANTENNA ON EXISTING BUILDING at 5134 Ute Hw,

Cemex Inc

A routine review of our files has brought to our attention that the referenced building permit application is about to expire. This permit application will expire on *6/7/2009*. Boulder County Building Code section 105.3.2 provides that applications for which the permit is not issued within 180 days expire by limitation. The time period may be extended for a period of not more than 90 days if a written request for an extension is received prior to the expiration of the permit. Extensions may only be approved if justifiable cause can be demonstrated to keep the permit valid.

Please provide either a written extension request or the required missing information that will enable us to issue the permit before the expiration date. If we do not receive this material or written extension request from you before the expiration date your application will expire 180 days after application.

If you do not desire to keep your permit application active but would like your plans and other material that were submitted returned to you, please come to our office within 14 days. If we are not notified within this time frame that you want these materials returned to you they will be discarded. If you decide at a later date that you would like to continue the project you will need to re-apply on a new building permit application and provide the required plans.

Thank You

Subject: RE: Permit for antenna's at 5134 Ute Hw

Hi Leslie,
My comment was probably related to the fact that I recently did a substantial modification review out at the Cemex plant. In the course of that I discovered the permit in the stack of items that had come out of Greg's office so I made the note in Accela and filed the permit in the Zoning Hold drawer.
I see no reason for you to keep this permit active.
Thanks,
Hannah

Subject: Permit for antenna's at 5134 Ute Hw

Hi Hannah

I found BP-08-1907 to install 3Panel antenna on existing building at 5134 Ute Hw in the Zoning Hold Drawer. I sent a letter on 10/24/2011 to the owners, Cemex about the permt application being expired and have not heard from them. However, there is a note on the file and in the computer from you dated 10/24/2011 that "Greg was waiting for info from the applicant." Was your comment generated from the applicant's response to the letter I sent? In any case, how long do we wait for that information? Greg's original note was made on 3-16-2009.

I'm working on cleaning out the Zoning Hold drawer.

Thanks
Leslie
