

Is there an Alabama Cement Plant
that trucks in Limestone from 470
miles away?

Fact checking CEMEX Officials

Example Provided by CEMEX Official at Sep 1st Hearing

“I’d live to give you an example of how extreme these situations are. There is a cement plant in the United States near Mobile, Alabama. It sources its limestone and shale-type materials from a location in Florida. It’s more than **360 miles away as the crow flies, about 470 miles away by road.**”

Trpimir Renić
EVP Strategic Planning
CEMEX USA

Holcim Theodore Cement Plant, Mobile, Alabama

Holcim Crystal River Limestone Quarry, Florida

Holcim (US) Theodore Cement Plant

Fact Sheet

LafargeHolcim

LafargeHolcim in the US

LafargeHolcim is the number one building solution provider in the world and the leading cement producer in the United States. Headquartered in Chicago, Illinois, we have resources across the country, whether operating under the name Lafarge, Holcim, Aggregate Industries or Latsmore Materials.

About the Holcim (US) Theodore Cement Plant

Located in Alabama, the Theodore cement plant has been in operation since September 1981. Dry Process Plant, four vertical preheater, built along the Theodore Ship canal, located on 175 acres (the 50 developed and 125 undeveloped).

Theodore has 86 employees among plant operation, Crystal River Quarry in FL, and Distribution. The annual capacity of 1.5 million metric tons of seven types of cement.

Theodore Products

The Theodore cement plant offers Portland, Type III, Low Alkali, Type III, Masonry Types S and N, ASTM C-1107 M80 and Type I/II cement.

Environmental Commitment

Theodore has increased the usage of alternative raw materials and fuels to reduce its total fuel footprint and to lessen impacts on environment. The plant achieves the while meeting PC NESHAP environment limits. Through the use of 100 Model Program, the plant operations are optimized to reduce emissions and improve efficiency.

Putting Safety First

LafargeHolcim's first priority is the health and safety of employees, subcontractors and visitors. The importance of safe behaviors and a safety mindset is constantly emphasized as the highest priority, with the goal of zero harm to people. The plant has instituted innovative, effective procedures to keep everyone safe.

Community Support

For many years the Theodore, Alabama Plant has been involved with many community outreach events such as the annual Coastal Cleanup. At the Coastal Cleanup Events we average cleaning up and properly disposing approximately 3,000 pounds of trash each year and have had as many as 150 volunteers at our Theodore Industrial Canal Zone. It is still called the Theodore Industrial Canal Zone but, we now have so many volunteers we clean up the Theodore Industrial Canal.

Crystal River Limestone Quarry

Quick-Setting Cements

LAFARGE

Holcim

360 Miles as the Crow Flies to Quarry in Crystal River, FL

“470 miles is farther away than the 90 miles by road CEMEX mentioned in the August 17th meeting. Maybe it really is feasible for them to truck materials in...”

Boulder County Planning Commission Board

*“All the limerock mined at the Crystal River site is **shipped by barge** to the company's cement plant in Theodore, Ala.”*

Tampa Bay Times

Bulk Transportation Costs

- Trucks are >**600%** more expensive than Barge.
- Rail is >**150%** more expensive than Barge.
- Barge is the **least expensive form of bulk transportation.**

The Art of Misdirection

There's a reason the CEMEX official **didn't say** *"315 nautical miles by barge."*

LOOK OVER THERE!

Fooled You, Didn't We?

A friendly reminder from Good Neighbors of Lyons

These are **highly skilled senior executives at a Global 2000 multi national corporation.**

You must never take anything they say at face value*

**Even if they have a pleasant sounding Canadian accent*
