INSTRUCTIONS FOR NON-CRITERIA REPORTABLE AIR POLLUTANT EMISSION NOTICE ADDENDUM FORM

Chemical Abstract Service Number (CAS No.) and Chemical Name: Please list the CAS No. and common chemical name for each non-criteria reportable air pollutant that will be emitted from this emission point. A list of CAS Nos. can be found in Regulation No. 3, Appendix B.

Reporting Bin: Please list the reporting bin (see Regulation No. 3, Appendix B) for each non-criteria reportable air pollutant being reported. The reporting level for each pollutant is based on the pollutant's Bin, release point, and distance to property line (See Regulation No. 3, Appendix A).

Control Equipment/Efficiency: Enter the type of air pollution control equipment (if any) that will be used to control emissions and its control efficiency for the non-criteria reportable air pollutant that it is controlling.

Emission Factor and Emission Factor Source: Please read the instructions for EMISSION ESTIMATES on the back of the APEN form. If the applicant requests that the Division calculate emissions from this source, then these two columns do not need to be completed. Please note that if the applicant is requesting that the Division calculate emissions, any information needed to make such calculations must be provided.

Requested Emissions: For new sources or modified sources, enter the requested (maximum) amount of emissions for each hazardous air pollutant (in pounds per year) in this column. This will become a permit condition. If this is an emission update, enter the updated emission estimate in the data year actual emissions column.

Data Year/Actual Emissions: Enter the actual emissions for each non-criteria reportable air pollutant (in pounds per year) for the data year (first year of operation for new sources) in this column. If this is an update only include the emission estimate for the last calendar year.

If you are unsure whether a compound is reportable, please include the compound on this form and the Division will determine whether it is reportable. Emissions of non-reportable compounds will not be billed.

THIS ADDENDUM FORM MUST BE ACCOMPANIED BY AN AIR POLLUTANT EMISSIONS NOTICE
A SEPARATE APEN AND ADDENDUM FORM MUST BE FILED FOR EACH EMISSION POINT OR GROUP OF MULTIPLE EMISSION POINTS
