(Do not punch line 2 if column 78 is blank)

Company: Martin Marietta Cement Co

SIC:

Address: _____ Lyons

County: Boulder

Person Contacted: Gerald Anderson

Phone :

Inspected by: Parsons / Mesch

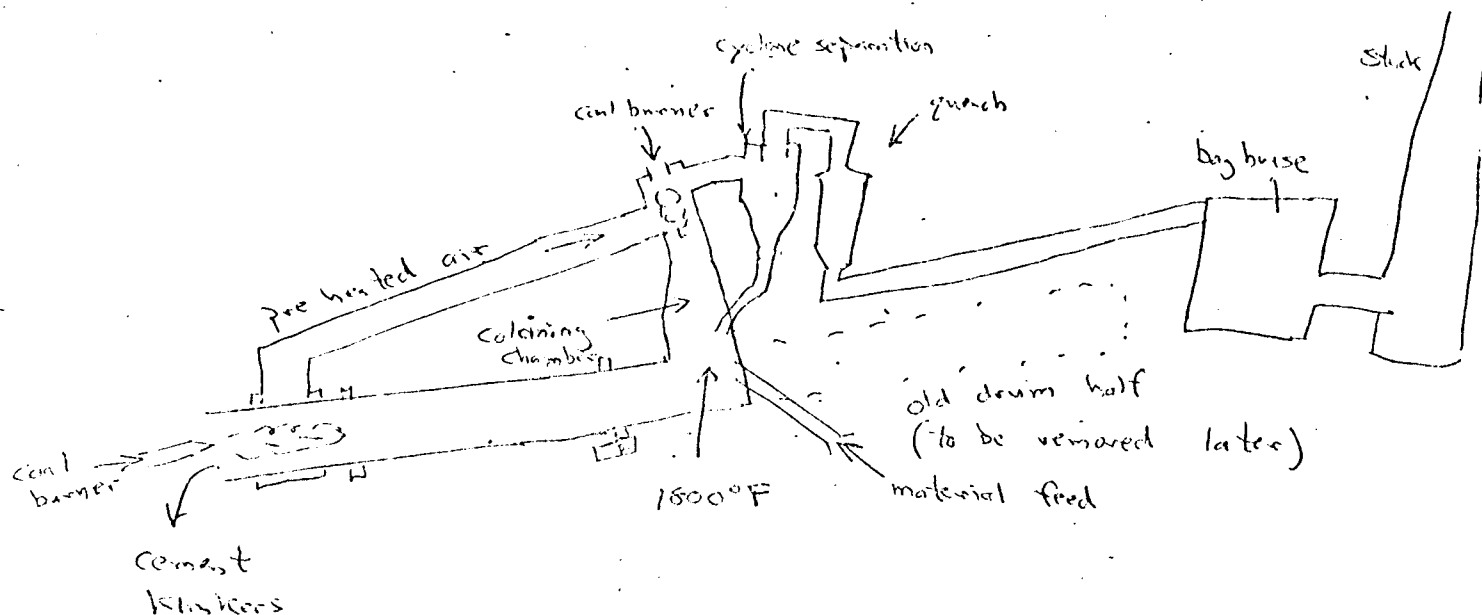

Time: 1:00 AM (P)

1. Met to review plans
2. Klinker 'A frame' to be enclosed. 100' of roof being added to south end. Internal air cleaning baghouse system to be installed. No outside emissions. Due to be done in October 1979.
3. Kiln to be cut in half. A fuel feed/caliner/coal burner will be installed on the end (now the middle). Roaster will be phased out. New burner unit will combust the hydrocarbons, incorporate the sulfur into the cement (thus reduce SO_2 emissions), reduce coal consumption, not change production rate. Since no increase in emissions, no change in nature of emissions, then no permit is required. updated ACEN and plans for modification, along with engineering and pilot test results will be sent within two weeks.
4. Construction is to start in July, to be completed by about Jan 1980.

APC-18 (Rev. 7-77-10)

Rev. 7-77-10)
5. Corporate HQ has approved funding for these projects.
