Hi Amy,

My name is Bart Lorang, and I live at 12800 N Foothills Hwy, Lyons, CO 80540. I live about 3/4 of a mile from the CEMEX Lyons Plant. I had a question about the attached Inspection Report, attached, issued earlier this year.

In the report, it states:

*"The approved post-mining land use for the site is pastureland. For final reclamation, **the plant and all associated structures will be removed from the site**, all pits except Pit A will be backfilled, and all disturbed land will be retopsoiled and revegetated to pastureland (see enclosed reclamation plan map)."*

Recently, as part of their proposal for 15 more years of mining at Dowe Flats, CEMEX has been asserting to the public that they have no plans to reclaim the plant, and the plant "could operate indefinitely" if the public doesn't agree to a 15 year mining extension at Dowe Flats. This doesn't seem to be consistent with what a normal mine/plant reclamation would entail where there is an estimated timeline and a plan for the plant reclamation at some point.

In the 1977 original reclamation plan (also attached), I cannot find the *reclamation plan of the plant* that your report seems to reference, though I can find the reclamation plants for the various pits. Do you happen to have a copy of the original reclamation plan for the plant? If not, where would I find the plant's reclamation plan and any timelines associated with reclamation?

Thanks so much for your time - I'm available at 303.717.0414 if you'd like to speak live!
