Re: SPR-97-160 Modification Request for Temporary Microwave Dish

Dear Dave,

Staff understands that Verizon Wireless plans to put a temporary microwave dish at the Cemex site located at 5134 Ute Highway.

Staff finds that the temporary change will not significantly alter the nature, character, and/or extent of the land use impacts of the development and therefore finds that with the conditions listed below the proposed change can be considered a minor modification.

Further changes to this facility may not be considered minor and at such time a special use approval shall be required.

The following conditions shall apply to this minor modification approval:

1. All conditions of previous Land Use approvals shall be complied with.
2. A building permit for the project shall be obtained and completed as required by the County Building Code.
3. The dish antenna is temporary and shall be located on the facility from July 16 to August 19, 2014. After August 19, 2014 all equipment, mounting hardware, and wiring shall be removed.

If I may be of further assistance, please call me at 720-564-2603.

Regards,

Hannah L. Hippely, AICP

Subject: Re: Verizon Wireless Temp MW at Cemex

The main goal is to provide coverage for Rockygrass which runs July 25-27. Secondly we'd like to cover the Folk Festival which runs Aug 15-17. It'll take some time to get it set up so July 16 would be a good start date. A couple days to take down so Aug 19 would be the end date.

This is what we'd prefer, but we could reduce the number of days if meant a speedier County approval process.

Thanks,

Dave

Subject: Verizon Wireless Temp MW at Cemex

Hannah, I received your voice yesterday, thank you. I've attached a couple of photos which show the location of the proposed temporary MW dish. I've also attached a spec sheet for the dish. This spec sheet is for a 2' diameter dish. The actual dish used could be smaller than this. One of the photos just shows a red area where the dish would be installed. This red circle is pretty much to scale to provide a feel for the size of the dish relative to surrounding equipment.

It would be installed in mid July of this year and would be in place for a month. Verizon Wireless plans to put a temporary telecommunications site in the town of Lyons to provide coverage for two music festivals going on during this period. The MW dish essentially provides a communications link to the Verizon Wireless network through the site at the Cemex plant.

Let me know if you need any additional info.

Thanks,

Dave

CompactLine Antenna, Dual Polarized, 2 ft
10.7 - 11.7 GHz

Product Description

RFS CompactLine® Antennas are designed for short-haul microwave systems in all common frequency ranges from 7 GHz to 60 GHz. The antennas are cost-effective products for microwave point-to-point transmission links in cellular and private user networks. Antennas are available in 1 ft (0.3m) up to 4 ft (1.2m) diameters. The modified cassegrain feed system results in a short shroud with reduced environmental impact, weight and tower load. The antennas are available in single polarised (SB) as well as in dual polarised versions (SBX). All antennas include a solid radome which is specially shaped to minimise its impact on the antenna's electrical characteristics. The antennas meet the ultra high performance radiation characteristic.

Antenna

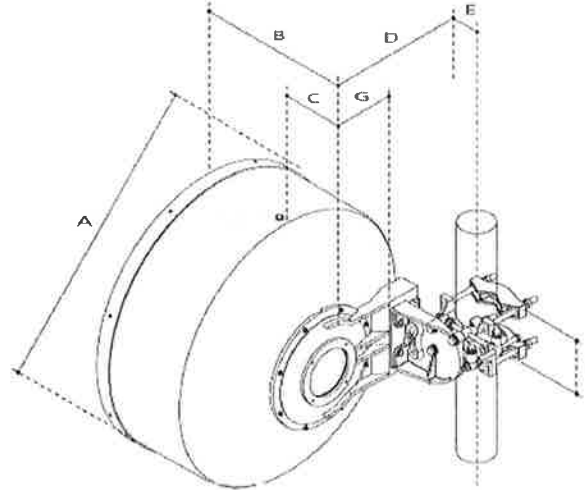

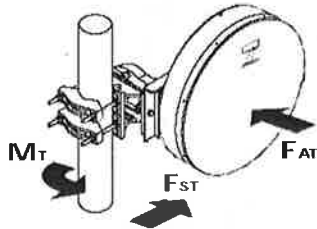

Technical Features

Product Type	Point to point antennas
Frequency, GHz	10.7 - 11.7
Diameter, ft (m)	2 (0.6)
Profile	CompactLine
Performance	Ultra High
Polarization	Dual
Regulatory Compliance	Standard, EN 302217, FCC
3dB beamwidth, (degrees)	3.0
Antenna Input	PBR100
Low Band Gain, dBi	34.8
Mid Band Gain, dBi	35.1
High Band Gain, dBi	35.4
F/B Ratio, dB	61
XPD, dB	30
IPI, dB	35
Max VSWR / R L, dB	1.30 / 17.7
FCC Standard	B
ETSI Standard	Range 1, class 3
Elevation Adjustment, degrees	± 30
Azimuth Adjustment, degrees	± 30
Polarization Adjustment, degrees	± 5
Pressure, bar (psi)	0.3 (4.3)
Radome	Included
Antenna color	White
Mounting Pipe Diameter minimum, mm (in)	51 (2)
Mounting Pipe Diameter maximum, mm (in)	114 (4.5)
Approximate Weight, kg (lb)	12 (26.5)
Survival Windspeed, km/h (mph)	250 (156)
Operational Windspeed, km/h (mph)	190 (118)

All information contained in the present datasheet is subject to confirmation at time of ordering

**CompactLine Antenna, Dual Polarized, 2 ft
10.7 - 11.7 GHz**

F _{ST} Side force max. at 110 km/h (68 mph), N (lb)	90 (20)
F _{AT} Axial force max. at 110 km/h (68 mph), N (lb)	270 (60)
M Torque max. at 110 km/h (68 mph), Nm (ft lb)	80 (60)
F _{ST} Side force max. at 200 km/h (125 mph), N (lb)	290 (65)
F _{AT} Axial force max. at 200 km/h (125 mph), N (lb)	905 (202)
M Torque max. at 200 km/h (125 mph), Nm (ft lb)	260 (192)

All dimensions in mm (in)

ØA	B	C	ØD for mounting pipe diam.				E	F
			219 (8.5)	114 (4.5)	89 (3.5)	51 (2.0)		
700 (28)	289 (11.5)	114 (4.5)		371 (14.6)	357 (14.0)	333 (13.1)	99 (3.9)	146 (5.7)
