Dale,

I am writing on behalf of Good Neighbors of Lyons with some additional documentation regarding structural expansion at the Lyons Cement facility.

According to CEMEX's own reclamation bond submissions to DRMS, from 2003 to 2023, the Mobile Equipment Shed structure has expanded and enlarged from **92,160 CF** (96'x32'x30') of airspace to **230,720 CF** (103'x64'x35') of airspace. This represents an increase in area of roughly 3,072 sq ft to 6,592 sq ft, equivalent to the size of a large house.

This is documented in CEMEX's reclamation plan submissions to DRMS in April 2003 (pg 12) and August 2023 (pg 11). I have attached both submissions as PDF for your convenience and **highlighted them in orange**.

2003

Mobile Equipment Shed	96	32	30	92,160
------------------------------	-----------	-----------	-----------	---------------

2023

I	Wash house	Concrete	10	10		8	800	SC
K	Mobile Equipment Shed	Steel²	103	64		35	230,720	SN
I	Burner Building	Concrete ¹	120	91		53	578,760	M

In accordance with sections 4-1002 and 4-1003 of the Land Use Code, this appears to represent an alteration and enlargement of a nonconforming accessory structure that increases both floor area and height. While permits may exist, I was unable to locate any Building Permits in Boulder County's online records for this structural enlargement.

Please let me know if you have any questions.

Sincerely,

Bart Lorang
 Good Neighbors of Lyons
