Subject: Re: and...a sign

Yes, I did approve it. Here's the history. Before I got here, when we processed Dowe Flats, one of the conditions of approval was that the staff would review and approve an entry landscape plan. The applicant took that to mean that staff could approve signs. They ran an early (draft) version of the plan by Graham, which apparently didn't have the signs on it. Then they ran the final set of plans, that did include signs, by parks and Open Space staff and Transportation staff. The staff from P@O and Transportation were only looking at the plans from their perspective, and so didn't catch the signs. Nonetheless, the applicant came away thinking that the "county" had approved the plans and signs. **That's how we got the two monument signs that are out there today, and which we could argue are nonconforming.**

Then when Cemex bought out Southdown, the new owners told plant manager John Lohr that he had to put up new signs. He originally wanted two 40 something sq. ft signs on poles. I told him no, based on it exceeding the sign code limits. Then Mike Figgs came in a few weeks later and explained the history I've cited above. Given these circumstances, and that they were willing to now make the new signs monument signs that at least meet the square footage requirement, I thought it made sense to let them have it, as I didn't want to get into a long argument that they had to take down one of the signs when they've got a fairly decent argument that the county sanctioned the original signs and never told them they had one too many signs. If you get a minute, would you please put a copy of this in the Dowe Flats file for the sake of posterity?

>>> Ruth Helz 04/09/01 02:18PM >>>

I have a permit application for a replacement sign for Cemex (formerly Southdown.) It states that you gave approval. Each sign is 32 s/f. Were there 2 there before? Because the sign code states that they can only have 1 free standing sign per lot line. Of course, if we gave them two before, then we can hardly complain at this point.
