Lyons, Colorado 80540

Re: Larimer County Quarry
Permit No. 77-341

Dear Mr. Berg:

The Colorado Mined Land Reclamation Board and Division commends Martin Marietta Cement for the excellent job of mining and reclamation being undertaken at the above referenced mining site.

The Division, on behalf of the Board, inspected this site on March 10, 1983. Too many times in the past, good operations such as this one were taken for granted. In an attempt to rectify this oversight, the Board has directed the Division to show the State of Colorado's appreciation for your excellent work. Hopefully, more operators will realize the simplicity and cost-effectiveness of concurrent reclamation as demonstrated at this site.

Again, the Board and the Division gives recognition to your company for doing such an excellent job.

Sincerely,

David C. Shelton
Director
