- ☒ No problems noted at time of inspection. As a reminder, be sure to file your Annual Report or Notice of Intent to Continue on the Permit Anniversary Date.
- ☐ Possible problem(s) - Note recommendation(s) below to avoid further complications or possible violation(s) at the time of the next inspection.
- ☐ Possible violation(s) - Note recommendation(s) below and reply to the Division by _____ to avoid enforcement action.
- ☐ Possible violation(s) pose(s) an immediate threat of harm to the environment, public welfare, or continued operation. Enforcement action forthcoming.

OBSERVATIONS OF IMPORTANCE:

1. Operation is following mining and reclamation plan.
2. Graded slopes are at 3:1 or better.
3. Some problems with revegetation. Topsoil availability is a problem at the site, however, operator has compensated for shallow areas by borrowing from areas where topsoil is deeper than normal.

RECOMMENDATIONS:

None
