RECLAMATION ANNUAL REPORT

LARIMER COUNTY QUARRY

LYONS, COLORADO

PERMIT NO. 77341

The purpose of this report is to comply with the Mined Land Reclamation Act of 1976, Statute 34-32-112 of House Bill 1065. This report follows the outlined requirements found in the Rules and Regulations of the Colorado Mined Land Reclamation Board, Sections 2.4, covering annual reports.

The Permit No. 77341 for the Larimer County Quarry was issued 6-4-78. I will show the areas reclaimed and the new areas opened up in the 1983-84 reporting period.

The areas outlined in red are mining, stripping, and back-filling areas which are considered major disturbances. The areas outlined in green are the areas that have been reclaimed. The areas that are cross-hatched are areas where new work was accomplished during this reporting period.

3.08 acres in area (J) were opened up in the reporting period 6-83 to 6-84. Areas (F), (G), (H), and (I) were opened in the years indicated on the map. All these areas are considered major disturbance and total 20.03 acres.

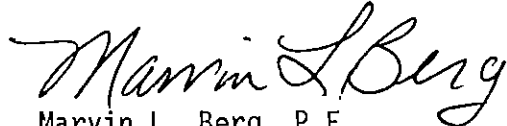

3.34 acres in area (F) were reclaimed in the 1983-84 reporting period. To date, 27.73 acres have been reclaimed.

Reclamation was accomplished using a dryland pasture mix which includes:

- 39% winter rye
- 13% ranger alfalfa
- 9% smooth broom
- 8% intermediate wheat grass
- 7% slender wheat grass
- 8% Nordan crested wheat grass
- 6% Russian wild rye
- 10% Jose fall wheat grass

These areas were seeded at a rate of approximately 50 pounds per acre and fertilized at the time of planting with industrial ammonium nitrate at a rate of approximately 200 pounds per acre. All areas are experiencing excellent growth. No reclaimed areas have been released from bond to date.

Plans for reporting period 6-84 to 6-85 include opening 3-5 acres for mining. Approximately 5 to 7 acres in area (G) will be contoured and seeded. Backfilling will take place in areas (G), (H), and (I).
